

OFFSET PERFORATING RULES

Product Selector and Confidential Dealer Price List

Effective 11/01/2009

Made with durable hard carbon steel and heat treated for strength, all rules are coated with double-sided tape, allowing you to apply the rules vertically or horizontally to the impression cylinder. The Center Rules are designed for high volume offset or web runs. The rules are stable and won't tilt or bend. The Side Rules are perfect for shorter runs. Rules are easy to set up and corners require no butt cut.
